DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 31-54, drawn to a surface reactor for improving liquid or gaseous fuel.

Group II, claim(s) 55-69, drawn to a method of manufacturing a surface reactor and a method for producing a liquid fuel additive.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Invention I is drawn to a surface reactor for improving liquid or gaseous fuel comprising a body wherein the body may be exclusively composed on an alloy comprising at least 80% tin. Invention II is drawn to a method of making a surface reactor or a method for producing a liquid fuel additive wherein the surface reactor comprising a supper material which is coated with an alloy and then subject to various steps not utilized in invention I, such as subjecting the alloy to an aging process, washing the material so as to form an activated slurry, filtering the activated slurry, neutralizing the activated slurry, casting the alloy in a mold and machining the alloy into a mold and machining the alloy into a continuous chip in such a manner that the obtained chip material is deformable.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marguerite J. McMahon whose telephone number is 571-272-4848. The examiner can normally be reached on Monday-Wednesday and Friday, 10am-6:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steve Cronin can be reached on 571-272-4536. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
